

I benefit from listening to XM Satellite Radio and its traffic and weather channels. The satellite radio provides a clear and more efficient signal than using AM & FM. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. The one that should be allowed to dictate what I listen to is myself. If these broadcasters are feeling threatened by the satellite radio system then they need to place money and time into improving their infrastructure of their system or they need to contact XM radio and work on becoming part of the satellite radio system, thereby increasing their audience. I urge you the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
